PROFESSIONAL SUMMARY

A 25-year-old who builds systems that solve real problems, from a job tracker that boosted my response rate by 22% to a delivery platform matching drivers in under 3 seconds. While most juniors stop at tutorials, I've shipped four production apps for actual clients using Node.js, PostgreSQL, and React. My backend architecture mindset and IBM-certified Agile discipline mean I don't just write features. I ship scalable, user-focused solutions. I'm ready to bring that same energy to Grapeware's YES Programme, master WordPress under your mentorship, and contribute real value from day one.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), EJS, React.js

Backend: Node.js/Express, Python/FastAPI, RESTful APIs, Java

Database: PostgreSQL, SQLite, MongoDB, Pinecone Vector DB

Mobile: React Native/Expo

Tools & Methods: Git/GitHub, GitHub Actions, Postman, Agile/Scrum (IBM-certified)

Exposure: WordPress concepts (via custom CMS builds), Cloudinary

PROJECTS: PROOF OF DELIVERY

JobTrack: AI-Powered Application Tracking | *Stack: Node.js/Express, Python/FastAPI, PostgreSQL, scikit-learn, EJS, Multer, pdfplumber*

- Built complete web application with Node.js backend and EJS frontend — demonstrating full-stack capability equivalent to WordPress theme development
- Engineered 45-field tracking schema in PostgreSQL capturing application metadata, resume versions, and response analytics
- Created CV parsing pipeline extracting skills from PDF/DOCX against 200+ technology database; automated 90% of manual data entry
- Implemented predictive analytics engine using scikit-learn; identified resume tailoring and referrals as top success predictors (0.42/0.38 correlation)
- Result: Improved personal job application response rate from 12% to 34% through data-driven platform

AXIORA-AI: MULTI-TENANT RAG CHATBOT PLATFORM | *Stack: Python (FastAPI), Node.js/Express, PostgreSQL, Pinecone Vector DB, EJS, Playwright*

- Built embeddable web widget with sandboxed iframe isolation and responsive design — modular frontend architecture
- Implemented automated web ingestion pipeline with Playwright deep-crawling and rate-limited background processing

HAPPY DELIVERIES: FOOD ORDERING & DELIVERY PLATFORM | *Stack: Node.js/Express, React Native/Expo, PostgreSQL + PostGIS, Socket.io, Google Gemini AI, Cloudinary*

- Built cross-platform delivery ecosystem handling 3 user types with role-based mobile interfaces

- Achieved sub-3-second driver matching using PostGIS spatial queries within 10km radius — database optimization under pressure
- Delivered live order tracking with 3-second GPS polling via Socket.io, enabling real-time synchronization across devices
- Engineered transaction-safe order lifecycle with PostgreSQL row-level locking, preventing race conditions during high-demand scenarios

CASALINGA TOURS: AI-POWERED TRAVEL BOOKING PLATFORM | *Stack: Node.js, Google Gemini API, Cloudinary, PostgreSQL*

- Built end-to-end booking system with 3 user roles (customers, managers, admins) and session-based authentication — comparable to WordPress user management
- Engineered responsive EJS frontend with dynamic search filters, availability checking, and favorites system using subquery patterns
- Created automated PDF ticket generation with branded styling and dynamic booking references — content automation expertise
- Implemented Cloudinary-integrated media management with automatic image transformation (WebP optimization, 1200px limits) — performance-focused asset handling
- Designed PostgreSQL analytics dashboard with revenue trends and customer lifetime value calculations

FREELANCE EXPERIENCE

Software Developer | Concurrent Client Delivery | June 2024 – February 2026

Remote/Hybrid delivery for Casalinga Tours and Before You Sign

- Managed parallel project timelines, delivering both platforms on schedule while maintaining code quality and client communication
- Before You Sign: Built vehicle verification platform with QR code generation, file upload pipelines (Multer), and admin verification workflows — experience with trust-building digital tools
- Casalinga Tours: Long-term platform build (20 months) with complex feature evolution and iterative client feedback — Agile-style development in practice

EDUCATION & CERTIFICATIONS

Advanced Diploma in Information and Communication Technology (Applications Development)

University of Mpumalanga, Mbombela | Completed: November 2025

Diploma in Information and Communication Technology (Applications Development)

University of Mpumalanga, Mbombela | Completed: December 2023

Certificates: IBM Applied Data Science with Python, IBM Agile Explorer (Scrum/Kanban), IBM Data Fundamentals
