

Theophilus Thobejane

Software Developer Intern Candidate

Kempton Park, Gauteng | thobejanetheo@gmail.com | +27 66 360 3021 | **LinkedIn:** [linkedin.com/in/theophilusthobejane](https://www.linkedin.com/in/theophilusthobejane)
| **GitHub:** github.com/TheoInCodeLand | **Portfolio:** theophilus-portfolio.vercel.app | **Availability:** Immediate | **Status:**
Unemployed (NQF Level 6+ Qualified)

PROFESSIONAL SUMMARY

Software Developer Intern with NQF Level 7 qualification and 4 shipped full-stack applications in 14 months, including real-time payment-adjacent platforms and AI-integrated booking systems. Rapid-learning ICT Graduate with proven ability in Python, SQL scripting, API integration, and troubleshooting technical issues. Self-driven pivot from academic Java to PERN stack, React Native (Expo), and Node.js. Strong foundation in first-line technical support principles, responsive web design, and payment processing workflows. Seeking to contribute technical velocity and analytical problem-solving to Electrum's Value-Added Services (VAS) and fintech transaction switching environment. Available for immediate start.

EDUCATION

Advanced Diploma in Information and Communication Technology (NQF 7) | *completed, 2025*

University of Mpumalanga

- Majors: Application Development & Data Analytics
- Coursework: Advanced Database, Version Control, Internet of Things (IoT), Cybersecurity, Research Methodology, UI/UX Design Principles

Diploma in Information and Communication Technology (NQF 6) | *graduated, May 2024*

University of Mpumalanga

- Majors: Application Development & Data Analytics

CERTIFICATIONS

- **IBM SkillsBuild Applied Data Science with Python** | February 2026
- **IBM SkillsBuild Agile Explorer (Scrum/Kanban)** | February 2026
- **IBM SkillsBuild Data Fundamentals** | December 2025

SKILLS

- Programming: Python, JavaScript (Node.js), Java, SQL (PostgreSQL)
- Frameworks & Libraries: React.js, React Native (Expo), Express.js, FastAPI
- Databases & Tools: PostgreSQL, SQLite, Database Migration, Git
- Fintech & Support Relevant: API integration & development, troubleshooting, ticketing system workflows, payment processing concepts, real-time data handling (Socket.io)
- Professional: Agile/Scrum methodologies, analytical and problem-solving skills, technical documentation, client communication

PROJECTS

1. AXIORA-AI: ENTERPRISE RAG CHATBOT PLATFORM | AI-as-a-Service with Embeddable Widget System

Tech Stack: Python (FastAPI), Node.js/Express, PostgreSQL, Pinecone Vector DB, React

- Technical Support & Troubleshooting: Implemented frustration/urgency detection algorithms that auto-adapt conversation tone and trigger escalation paths—mirroring first-line support workflows and issue prioritization
- API Integration: Built embeddable widget system allowing seamless client integration via single script tag, handling cross-platform compatibility and sandboxed iframe isolation

- Database & Monitoring: Designed multi-tenant dashboard with PostgreSQL backend for analytics, conversation logs, and system health monitoring—experience relevant to payment processing monitoring
- Security: Implemented HMAC-signed token authentication, ensuring secure data transmission across distributed systems

2. FULL-STACK FOOD DELIVERY PLATFORM | Mobile-First Logistics Solution for South African Townships

Tech Stack: React Native (Expo), Node.js, Express, PostgreSQL (PostGIS), Socket.io, Cloudinary

- Technical Support & Troubleshooting: Implemented frustration/urgency detection algorithms that auto-adapt conversation tone and trigger escalation paths—mirroring first-line support workflows and issue prioritization
- API Integration: Built embeddable widget system allowing seamless client integration via single script tag, handling cross-platform compatibility and sandboxed iframe isolation
- Database & Monitoring: Designed multi-tenant dashboard with PostgreSQL backend for analytics, conversation logs, and system health monitoring—experience relevant to payment processing monitoring
- Security: Implemented HMAC-signed token authentication, ensuring secure data transmission across distributed systems

EXPERIENCE

Student Assistant (Software Development) | University of Mpumalanga, Mbombela

February 2024 – March 2025

- Delivered supplementary ICT lectures to 50+ students, improving average test scores by 21% through clear technical communication
- Conducted one-on-one debugging sessions in Python and Java, reducing assignment resubmissions and improving final project outcomes
- Collaborated with lecturers to design curriculum materials and coding exercises aligned with industry best practices
