PROFESSIONAL SUMMARY

Rapid-learning ICT Graduate (NQF Level 7) with 4 shipped full-stack applications in 14 months, including a real-time geospatial delivery platform and AI-integrated booking ecosystem. Self-driven pivot from academic Java to PERN stack, React Native (Expo), and Node.js. Strong foundation in responsive web design, mobile development, and UI/UX implementation. Proven ability to translate business requirements into maintainable, visually engaging digital solutions. Seeking to contribute technical velocity and design thinking to Signa Opportunity's digital innovation strategy through the YES initiative.

EDUCATION

University of Mpumalanga | *Mbombela, Mpumalanga*

Advanced Diploma in Information and Communication Technology (bachelor's degree Equivalent) |
completed Nov 2025

- Majors: Application Development & Data Analytics
- Coursework: Advanced Database, Version Control, Internet of Things (IoT), Cybersecurity, Research Methodology, UI/UX Design Principles

University of Mpumalanga | *Mbombela, Mpumalanga*

Diploma in Information and Communication Technology (ICT) |
Feb 2021 - Nov 2025

- Majors: Application Development & Data Analytics
- Coursework: Data Structures & Algorithms, Programming in Java, Machine Learning (ML), AI, Object-Oriented Programming (OOP), Software Development Lifecycle (SDLC), Project Management & Planning, Application Development, Professional Communications

CERTIFICATIONS

- **IBM SkillsBuild Applied Data Science with Python** | February 2026
- **IBM SkillsBuild Agile Explorer (Scrum/Kanban)** | February 2026
- **IBM SkillsBuild Data Fundamentals** | December 2025

SKILLS

Programming: Java, Python, JavaScript, Node.js

Tools: Docker, Visual Studio Code, Jupyter Notebook, Git, Microsoft Office Suite (Excel, PowerPoint, Word).

Frameworks & Libraries: React.js & React Native (expo) and express.js, Django, & FastAPI.

Databases: Vector DB, PostgreSQL, Mongo DB, Database Migration (Flyway/Liquibase).

Concepts: Machine learning (ML), LLMs, Data structures and Algorithms, RESTful API Design, troubleshooting, software development lifecycle (SDLC), Agile, Power BI, API integration & Development, DevOps, CI/CD.

Behavioral: Analytical and Problem-Solving skills, Adaptability, Collaboration (teamwork), Detail Orientated, Time Management, communication and interpersonal abilities.

PROJECTS

1. AXIORA-AI: ENTERPRISE RAG CHATBOT PLATFORM

AI-as-a-Service with Embeddable Widget System

Tech Stack: Python (FastAPI), Node.js/Express, PostgreSQL, Pinecone Vector DB, React

- Developed embeddable widget system allowing clients to integrate AI chatbot with single script tag, featuring sandboxed iframe isolation and responsive design
- Created conversation UI with emotional intelligence - implemented frustration/urgency detection that auto-adapts tone and suggests escalation paths

- Designed multi-tenant dashboard with clean data visualization for analytics, conversation logs, and system health monitoring
- Implemented secure authentication flows with HMAC-signed tokens, ensuring seamless yet protected user experiences across embedded widgets

2. STOCK PREDICTOR

- **Tech stack:** Python, Pandas & NumPy, Scikit-learn, Matplotlib, Git.
- Trained mathematical models to predict stock price trends using linear regression time series algorithms
- Scripted the predictive stock price model and obtained a prediction accuracy of 90.07%

3. FULL-STACK FOOD DELIVERY PLATFORM

Mobile-First Logistics Solution for South African Townships

Tech Stack: React Native (Expo), Node.js, Express, PostgreSQL (PostGIS), Socket.io, Cloudinary

- Architected responsive mobile interface handling 3 user roles (customers/drivers/managers) with role-based UI adaptations and real-time status indicators
- Implemented visually engaging UI components including animated order cards, gradient-based status badges, and intuitive navigation flows using React Native styling APIs
- Designed real-time tracking interface with map integration, driver location markers, and delivery countdown timers - improving user experience clarity by 85%
- Built cross-platform solution (iOS/Android) using Expo SDK, ensuring consistent branding and performance across devices
- Integrated image optimization pipeline via Cloudinary for restaurant menu photos, reducing load times by 40% while maintaining visual quality

EXPERIENCE

University of Mpumalanga (UMP) | Mbombela, Mpumalanga

Student Assistant (Software development) | Feb 2024 - Mar 2025

- Delivered supplementary ICT lectures to 50+ students, improving average test scores by 21% through clear technical communication
- Developed automated grading systems using Python scripts, reducing grading workload by 60% and ensuring consistent rubric-based assessment
- Conducted one-on-one debugging sessions in Python and Java, reducing assignment resubmissions and improving final project outcomes
- Collaborated with lecturers to design curriculum materials and coding exercises aligned with industry best practices
