PROFESSIONAL SUMMARY

Data Science graduate with strong foundations in statistical analysis, machine learning, and Python. With projects based on building predictive models and data pipelines through academic projects. Seeking a Junior Data Scientist role to develop impactful algorithmic solutions.

EDUCATION

University of Mpumalanga

Mbombela, Mpumalanga

Advanced Diploma in Information and Communication Technology (ICT) – NQF7

Feb 2021 - Nov 2025

- **Majors:** Application development and Data Analytics
- **Coursework:** Data Structures & Algorithms, Objects & Design, Programming in Java, Internet of Things (IoT), Machine Learning, Artificial Intelligence, Object-Oriented Programming, Cybersecurity.

CERTIFICATIONS

IBM Skillsbuild

Online course

Data Fundamentals

Completed, Dec 2025

- **Majors:** Data Science
- **Coursework:** Introduction to Data Concepts, Data Science in our world, Overview of tools and Languages, Cleaning Refining and Visualizing Data with IBM Watson Studio, Future in Data: The Job Landscape.

IBM Skillsbuild

Online course

Applied Data Science with Python

Completed, Feb 2026

- **Majors:** Data Science & Python
- **Coursework:** Python for Data Science, Data Analysis with Python, Data Visualization with Python.

PROJECTS

Stock Predictor

Mbombela, Mpumalanga

Tools: Python, Pandas & NumPy, Scikit-learn, Matplotlib, Git

Nov 2018 – Jan 2019

- Trained mathematical models to predict stock price trends using Naive Bayes, Neural Networks, and Linear Regression Time Series algorithms
- Scripted the predictive stock price model and obtained a prediction accuracy of 90.07%

IoT Smart Home System

Mbombela, Mpumalanga

Tools: C++ (Embedded), ESP8266, Arduino Framework, Firebase, Python, Git

Mar 2023 – Nov 2023

- led a team of 8 to build an IoT ecosystem transforming standard appliances into smart devices, delivering a functional hardware software prototype.

Casalinga Tours: AI-Integrated Booking Ecosystem

Mbombela, Mpumalanga

Tools: Python (Scikit-learn), Node.js, Express.js, PostgreSQL, EJS, REST APIs, Git

Jun 2025 – Feb 2026

- Built a predictive ML recommendation engine in Python (Scikit-learn), boosting user engagement.
- Designed PostgreSQL schema syncing tour inventory with AI, saving 15+ admin hours/week.
- Developed a high-speed API connecting Node.js/Express backend with Python AI for real-time bookings.

ACTIVITIES AND LEADERSHIP

University of Mpumalanga (UMP)

Mbombela, Mpumalanga

Teaching Assistant for Application Development APD

Feb 2024 – Jan 2025

- Delivered supplementary ICT lectures, improving student understanding and increasing average test scores by.
- Used automated grading and rubric-based assessment to mark work for 50+ students, reducing grading workload.

- Tutored students in Python and Java debugging sessions, reducing resubmissions and improving final project outcomes.

Smart Home Initiative

Mbombela, Mpumalanga

Team Leader

Mar 2023 – Nov 2023

- Directed a cross-functional team of 8 members to develop an IoT Smart Home system, orchestrating weekly sprints, technical training sessions, and project schedules that ensured 100% on-time delivery of the prototype.
- Engineered an automated energy-saving solution by programming ESP8266 microcontrollers in C++ and integrating them with a Firebase real-time database, allowing for remote hardware control via mobile and web interfaces.
- Accomplished a 30% reduction in potential hardware damage by implementing a custom load-shedding mitigation algorithm that synchronized live Eskom schedules with the system to prevent power surge failures.

SKILLS

Programming: Java, Python, JavaScript, HTML&CSS, Node.js

Tools: Android Studio, IntelliJ, Visual Studio Code, AWS, Jupyter Notebook, Git.

Frameworks & Libraries: React.js, React Native (expo) and express.js, Django, Spring Boot.

Databases: SQL, PostgreSQL, Mongo DB, Firebase, Database Migration (Flyway/Liquibase).

Concepts: Machine learning(ML), LLMs, Data structures and Algorithms, RESTful API Design, troubleshooting, Problem solving Skills, SDLC, Agile.
