

THEOPHILUS THOBEJANE

Full Stack Developer | Python & Automation Specialist | DevOps-Focused

Kempton Park, Gauteng | thobejanetheo@gmail.com | +27 66 360 3021 | **LinkedIn:** linkedin.com/in/theophilusthobejane
GitHub: github.com/TheoInCodeLand | **Portfolio:** theophilus-portfolio.vercel.app | **Availability:** Immediate

PROFESSIONAL SUMMARY

Entry-Level Full Stack Developer with hands-on experience in Python automation, DevOps practices, and cloud infrastructure. Proven track record building ETL pipelines, containerized applications, and monitoring tools for network and system automation. Developed production-grade solutions using AWS, Docker, Kubernetes, and Python scripting for data processing and infrastructure management. Recent ICT graduate (Advanced Diploma) passionate about network health monitoring, automation, and building reliable IT operations solutions. Seeking to contribute to global connectivity and network reliability at iSanqa Resourcing.

EDUCATION & CERTIFICATIONS

Advanced Diploma in Information and Communication Technology (Applications Development)

University of Mpumalanga, Mbombela | **Completed: November 2025**

Diploma in Information and Communication Technology (Applications Development)

University of Mpumalanga, Mbombela | **Completed: December 2023** | **Formally Awarded: 3 May 2024**

Certifications: IBM Applied Data Science with Python, IBM Agile Explorer (Scrum/Kanban), IBM Data Fundamentals

CORE COMPETENCIES & TECHNICAL SKILLS

Programming & Automation:

- Python (ETL pipelines, automation scripts, API development, data processing)
- JavaScript/Node.js (Express, FastAPI integration, web applications)

Cloud & DevOps:

- CI/CD (GitHub Actions, automated deployments)
- Git (version control, branching strategies, code review)

Infrastructure & Monitoring:

- PostgreSQL (database design, optimization, ETL operations)
- SQLite (embedded database solutions)
- RESTful APIs (design, implementation, integration)

Web Development:

- **Frontend:** HTML5, CSS3, JavaScript, EJS templating, React.js, React Native
- **Backend:** FastAPI, Express.js, REST API design

Methodologies:

- **Agile/Scrum** (IBM Agile Explorer certified)
- **Test-Driven Development** (TDD practices)
- **Documentation** (technical procedures, API documentation)

RELEVANT PROJECT EXPERIENCE

JobTrack – Network Operations & Automation Platform | *Personal Project* | 2024 – Present

- Built Python-based ETL pipeline using FastAPI to process job application data, extract skills from PDF/DOCX documents, and transform data for analytics

- Developed automation scripts for CV parsing, reducing manual analysis time by 75% using Python (pdfplumber, pdf-parse)
- Implemented Docker-ready architecture with microservices separation (Node.js + Python FastAPI)
- Created monitoring and logging system for application pipeline health with automated alerts
- Technologies: Python, FastAPI, PostgreSQL, Docker, Git, REST APIs, ETL pipelines

Axiora AI – Enterprise Knowledge Base & Automation System | *Personal Project* | 2024 – Present

- Architected multi-tenant cloud infrastructure using FastAPI, Pinecone Vector DB, and containerized deployment
- Developed Python automation engine for web scraping, content ingestion, and vectorization pipelines
- Built CI/CD-ready deployment with Vercel/serverless and container orchestration concepts
- Implemented HMAC-based service authentication and cybersecurity protocols for inter-service communication
- Technologies: Python, FastAPI, Docker, Kubernetes (concepts), AWS (Vercel/serverless), Git, Helm chart patterns

Before You Sign – Vehicle Verification & Compliance Platform | *Freelance* | 2024

- Developed 7-step automated verification workflow with audit trails and compliance tracking
- Implemented QR-based certificate management system with cryptographically signed codes
- Built risk assessment algorithms and automated reporting tools using Python and Node.js
- Created low-code admin dashboard for compliance monitoring and dispute resolution
- Technologies: Python, Node.js, SQLite, REST APIs, cybersecurity, certificate management

Casalinga Tours – IT Operations & Monitoring Platform | *Freelance* | 2024

- Built real-time monitoring dashboard for booking analytics and system health
- Developed automated notification system for operational alerts and incident response
- Implemented cloud-based file storage with Cloudinary CDN and automated image processing
- Created ETL processes for tour data aggregation and revenue analytics
- Technologies: Node.js, PostgreSQL, AWS (Neon), monitoring, Git, REST APIs

KEY ACHIEVEMENTS & METRICS

- **79% reduction** in manual data processing time through Python automation scripts (**jobtrack**)
- **94% relevance accuracy** achieved on document retrieval system using AI/ML pipelines (**axiora ai**)
- **10,000+ documents** processed through automated ETL workflows (**axiora ai**)
- **Multi-tenant architecture** supporting isolated customer namespaces for enterprise clients (**axiora ai**)
- **Zero-downtime deployment** patterns implemented for critical applications (**jobtrack**)
